FEBRUARY 13, 2025

## Multiplex Respiratory Virus PCR Results

As of February 13<sup>th</sup>, 2025, Influenza A or B positive results for nasopharyngeal specimens will be called for **in-patients only** and directly to the patient care unit. Positive influenza results are not called for outpatients, discharged patients or patients in the Emergency Department. Positive results for other respiratory viruses (including COVID-19) are not called.

Results for interfaced partner facilities cross into their Health Information System shortly after results are verified in the HRLMP Lab Information System. Results for non-interfaced partner facilities will be faxed in the usual manner.
