JANUARY 18, 2024

UPDATE ON HAMILTON REGIONAL LABORATORY MEDICINE PATHOLOGY REPORTS

Since Hamilton Health Sciences (HHS) implemented its new Hospital Information System in 2022, Pathology Reports from the hospital have only been available to ClinicalConnect Participant Organizations that are authorized to view data from the Ontario Laboratories Information System (OLIS), via ClinicalConnect. This limitation has now been removed, as Pathology Reports from the Hamilton Regional Laboratory Medicine Program (HRLMP) are now available to all authorized ClinicalConnect users in PDF format in the Pathology & Genetics Module. In ClinicalConnect, the "Source" of all HRLMP Pathology Reports is "HHSC".

HHS' Genetics Reports generated prior to June 4, 2022 continue to remain available in ClinicalConnect to all authorized users; reports from after that date are not currently available in ClinicalConnect however work is underway to integrate them as well.

For ClinicalConnect technical support, please contact the HITS Helpdesk at 905-521-2100 ext. 43000.
